Lam Cheun was found not guilty of murder, but detained in custody to answer The Reichstag has adopted a bill the two charges mentioned above. Attorney-General, appeared for the justructed by Messrs. Hastings, Hastings, Dennys and Bowley, conducted the defence. Inspector W. Kent was in charge of the case. The particulars of the alleged offences are that defendant (1) on February olast robbed Chan Chunho of a piece of cloth and robbed Hui Sui-king of a gold hair-press, 14 pieces of clothing, a cloth, a towel, a wrapper, a leather suitcase and \$73.50 in money (2) on the same date being in possession of one revolver, 14 rounds of ammunition and 5 empty cartridge

Before the Attorney-General opened the case for the Crown. Counsel for the defendant raised the question as to the legality of the present proceedings. Mr. Jenkiu argued that as the prisoner, had been acquitted on the charge of murder, he could not legally be arraigned on a lesser charge in connection with the same crime. He quoted various authorities in support of his argument; but the Pulsne Judge ruled against him, saying that the present trial was entirely separate from the previous one though the evidence for the Crown might proceed along similar

The jurors were Messrs. H. L. Edwin, A. A. Tavares, D. Mc Kenzie, A. E. Ablong, M. E. Mennier, G. Mc Leod and J. D. Kinnaird.

The evidence produced was practically the same as that given at the former trial. The case is proceeding.

INQUEST.

London, June 18th. At the inquest on the late Rt. Hon. Big Henry Primrose, a verdict was recorded of suicide whilst of unsound mind.

amundsen's flight abandoned.

LONDON, June 18th It is thought in connection with the cable message from Christiania that Amundson's abandonment of his trans Polar. flight Iwas due to engine brouble. The most elaborate measures had been taken to assist the explorer. Two expoditions had left, one from Bergen and one from Hamburg, to establish food depôte and to lay a trail on the snow! fields in the north of Spitzbergen. The trail was to be laid by means of coloured gauze dropped from neroplanes.

New York, June 18. In the contest for the world flyweight championship, Pancho Villa, the Filipino, knocked out the holder. Jimmy Wilde, in the seventh round.

NEW YORK, June 18. There were 48,000 people present at the open air fight, which took

place on the Polo Ground. Wilde was always -game, but could not withstand the onslaught of the Filipino, who from the first bell to the knockout was almost always rushing in and punishing his opponent. The only round in which the Welshman gave a glimpse of his old-time form was in the sixth, when he met his opponent in the centre of the ring and exchanged

punches evenly. During the fight Wilde protested against Villa's backhand blows, but the Referee declared them fair. In Just as the bell sounded Villa floored Wilde with a right to the jaw and then hit the Welshman at will. Just as the bell sounded Villa flored Wilde, who was carried to his corner

in a dezed condition. Wilds started the seventh round with his right eye closed. After taking terrible punishment he received a straight right on the jaw. and fell flat on his face in an unconscious state. He recovered a few minutes later and smiled game-Iv when the crowd cheered him.

The Master of Ceremonics made the statement that Wilde was the gamest loser nugilism ever saw.

PLANET OF DEATH.

SCORCHED AND PROZEN

RLUSIVE MERCURY

Dr. A. C. D. Crommelin, Assistat Groenwich, Observatory, writes in the Daily Mail :--

The clusive little planet Mercury which is not often visible to the naked eye in England, is now the best position for observation in the evening sky.

It becomes visible low in W.N.W. at about 8.15 p.m. (Summor Time) and romains in sight for about 45 minutes, after which it munications from people who sinks in the mists of the horizon. The bright star Capella, a long way and the ruddy Mara will be seen anything could be done about it

Mercury came into the limelight the exis of its orbit served to verify Einstein's law. It has the quickest motion, the shortest time of revolution, and the most eccentric orbit of all the planets. Each these points help to render it suitable for verifying the law. In fact, it is the only body whose motion shows any appreciable devia tion from Newton's law. ...

It is almost certain that Mercury always turns one face to the Bun, as the Moon does to the Earth. This would render it uninhabitable, since one side would be masted and the other frozen. But in addition it appears to be practically airless and waterless, like the Moon. Both bodies have very low albedoes or reflective powers, and this suggests that their surfaces are in a similar condition.

In just a year from now Mercury will transit the Sun, and may be seen in a telescope (dark glass ossential) as a small black spot on its surface.

much will yet bewritten about both; the themes are as inexhaustible as Quite as fully Peking is: an eternal city. But ittis changing sapidly for China too. visitors with new points of view will perennially see new things in Peking, and reinterpret Peking to guit themselves. So I venture to say something also about the imperial city: Peking is passing. Not only the reality, the visible thing, is the twentieth century, is preparing to emerge, says the Christian

Science Monitor. Seasoned travellers may have remarked that in labour expended and art objects that exists anywhere. Council. in time required to complete, that which marches magnificently across the wide city from the Bell Tower to the Altar of Heaven. dwarfs decidedly Europe's most pretentious extravagance, Vergailles. Moreover, in artistic conception and resoluteness, surely it is superior to the Louis XVI arrogance. Its scope makes the modern visitor gasp. From end to end this sweep of notable buildings must be nearly three miles longhave heard it asserted as longer. is the spinal column of Peking.

Quite like the best. West End models, is the new footwear department Messrs. Lane, Crawford and Co, have opened inside their well known store. Formerly the footwear department was placed the outfitting depart ment, but growing demands have made this space inadequate. The mezzanine floor between the ground and the first floors has now been tastefully arranged as the footwear department and here many famous makes are displayed. Customers will find this latest improvement very convenient indeed. They will also appreciate the new arrangement of the trunk department which has found a new home too on the same floor.

WHY PRICES HERE ARE. HIGH.

The question has many times been asked: Why are the charges of admission at the Hongkong June 24,-0. N. kinemas so high? The reason, says Mr. H. W. Ray, is because of the public's luke-warm support. If | June 24.- C. N. the picture theatres were better patronised, if those empty seats were more few and far between. then prices would be lower. It is June 21.-C. N. customary when screening a picture which is above the usual run of films shown to put up the prices of admission. However, as an experiment, Mr. Ray has decided to show a masterpiece at the Star and not put up the prices. By special request, he is presenting at Kowloon to-day the famous production, "Man-Woman-Marriage." It is being shown for one day only, and

at usual prices. To-day is the last opportunity picture-goers have of seeing the exquisite film, "The Love Light," starring the screen idol, Mary Pickford, at the Coronet.

More Smiles Now

For women have prettier teeth

A new way of teeth cleaning has multiplied smiles. Millions of women now use it. It has changed ever you look now you see pretty teeth which other people envy. This new method is at your

command. Prettier teeth, and safer: teeth as well, can be yours.

Combata the film This new way combats filmthat viscous coat you feel. The old ways of beusking never did that effectively.

Film clings to teeth, gets between the teeth and stays. It absorbs stains and, if you leave it, forms the basis of cloudy coats, including tartar, That's why most teeth look dingy. .

Film also holds the acid in contact with the teeth to cause decay. Germs breed: by millions in it. They, with tartar, are the chief cause of pyorrhea.

Most tooth troubles, which few escape, are now traced to that

Two methods found Dental science, after long research, has found two ways to fight that film. Years of tests have amply proved their efficiency. Now leading dentists everywhere are advising their daily use.

A new-type tooth paste has been created, modern, scientific and correct. The name is Persodent. dingy teeth to whiter teeth. Wher-! These two film combatants are now embodied in it. It is bringing to countless homes a new dental

Two other enemies

Teeth have two other great ensmiles. One is starch, which gomethe teeth, and which may ferment and form acid. The other is mouth.

Pepsodent multiplies the starch digestant in the saliva. to better combat those starch deposits It multiplies the alkalinity of the saliva, to better neutralize mouth acids. Thus it gives manifold power to Nature's great toothprotecting agents. That's another result of modern dental research

45 nations use it

Persodent now has world-wide use, largely through dental advice-Careful people of some forty-fivecountries see its benefits today.

Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teetly whiten as the film-coats disappear.

One week will convince you that you and yours should always use this method.

Pepsodent The New-Day Dentifrice

A scientific film combatant, which whitens, cleans, and protects the teeth without the use of harmful grit. Now advised by leading dentists the world over. For sale in two sizes by all druggists.
